Thus, the company achieved a record result for the forth time in a row despite the economic crisis and numerous IT companies which had to put up with drastic declines in demand and price pressure.

Beside **long-term stable customer relations** and a **very conservative booking of licences** (throughout the project duration) this earnings development was achieved by constantly **gaining new projects**.

These **new projects** were predominantly concluded as companies often **optimise earnings due to savings and efficiency improvements in the personnel area** in times of crisis. The companies rely on ATOSS which already have been realising optimisation potentials for more than 20 years and have a proven competency here.

Furthermore, ATOSS focuses on the **continuous further development of the products**. Many IT companies make economies in terms of R&D in times of crisis. On the contrary, ATOSS spent roughly EUR 5.6 m for R&D in 2009 alone (approx. 20% of sales). As the range of products is thus further improved, the company will be able to continue to stand out from competition also with future product generations.

The statements of ATOSS' management as well as the estimates (SES) imply the mentioned „continuation of the business development on the level of 2009“ for 2010. This can be interpreted as **moderate growth expectation**. Therefore, the estimates as well as the PT remain unchanged.

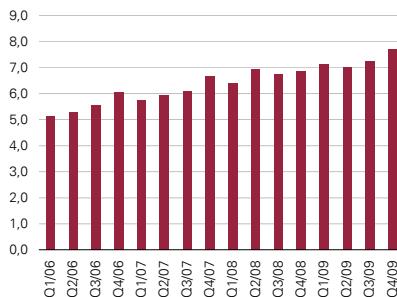

**The BUY rating is reiterated with a PT of EUR 16.**
